

FUEL REPORT

STAT Hazel, ODS E [] 29 Feb 82

Should continue sending in fuel report?

Talked to Dave 22 Feb 82

Dave informed, after talking to [], could:

STAT

- 1) Discontinue all reporting & monitoring or
- 2) Give ^{components} option to continue and report progress through the computer system. This would mean putting the info in the system and getting a run.

STAT 2 Mar 82 []

He agreed could discontinue with no impact. Info never used, only reported LSD in annual report. Current emphasis does not require ^{the} continuation of reports.

Discontinue report but maintain internal report in case circumstances change and reporting requirements resume. Factors supporting discontinuance: deregulation, never sent to DOE, new administration, DOE dismantled, 90 day supply of fuel/oil glut. Continue to be conservative in use of energy resources.
